

News:

The new Dataline Group has just celebrated it's first anniversary and we would like thank all of our clients for your continued support. We are continually trying to improve our service levels so we welcome any feedback or recommendations you may have.

The Dataline Group has updated it's website (www.dataline.com.au) which now includes a download area for FAQ's, newsletters, release notes and functional descriptions of our modules.

New Links Release - Links 2.5.5

A new version of Links has recently been released and includes the following new modules, enhancements and fixes.

New modules:

- Email Alerts
- Scheduling

These two new LINKS modules add some long waited features for both Managers and IT administrators.

Email Alerts are primarily designed to:

- a) Warn you if the file imported has some data inconsistencies etc
- b) Advise management or users of various processes that have been completed

i.e. If importing a file with duplicate cheque numbers, and LINKS is set to prevent this, you will be emailed of the problem and can take action OR after a batch of cheques have been authorized or printed, you will be notified.

The NEW scheduling module is a fantastic way to make LINKS even more automated than ever before! You may want to print cheques after they have been authorized, and only do so within business hours or sequence your reconciliation processes in order of priority and time

Remove the need for Spreadsheets and unreconciled Bank and Suspense Accounts

LINKS reconciliation is a sophisticated generic matching tool

- Auto reconciliation up to 90-95% matching using flexible matching rules and tolerance matching.
- Multi-system, banks, accounts, funds, currencies
- Online real-time cash management
- Auto export back to your clients GL or host system
- Extensive online queries, audit trails and reporting

Enhancements:

- Multiple forms on process or Fund level for Fax, Email and Print
- Activity Log to search by Activity Type
- 'Robust' file signature checking DLL
- Ability to un-match ADJU and ADJB reconciliation adjustments

Fixes:

- AUTOREC and AUTOCLEAR processes in reconciliation streamlined when polling
- Validation of substitution variables for Rec, Fax, GLI and Email details

Future Links Release - Links 2.6

The next release of Links is due in March 2004. This release will see LINKS supported on Windows Server 2003, SYBASE V8.x and Windows XP. The release will focus on performance improvements, providing support for an additional forms package, improved transaction logging and various user features.

We will provide further information on the release in future newsletters.

NEW HARDWARE & CONSUMABLE DIVISION

Dataline is one of Australia's leading knowledge centers on in-house Secure MICR cheque printing solutions and consumables.

We have continually provided the highest quality MICR service and advice to our clients for over 15 years, aiding many of you to comply with Australian Payments Clearing Association (APCA) strict standards for MICR form design, security, print quality, compliance and fraud reduction methods.

Having recently been awarded Master Distributor status for Lexmark MICR solutions and peripherals, we have re-entered the Hardware and Consumable market with an even stronger focus than before.

Whilst retaining a strong focus on Security MICR printing solutions, our services and products offerings have expanded to include all Lexmark and IBM Mono, Colour, and MFD (multi-function device ie. Fax, copier, scanner and printer)

So if you are looking for the most competitive MICR and Laser printer prices in the market, please do not hesitate to contact Levina White . We welcome the opportunity to discuss your current and future IT printing and output requirements.

MICR Toner alert !

We have been made aware that remanufactured MICR toner cartridges are being sold into the market. Please note these cartridges can cause problems with your printer and compromise MICR security. Furthermore the capacity of these cartridges can be as low as 50% of the certified cartridges.

Thinking of Upgrading or moving your LINKS Server?

For any assistance in upgrading your Links Server to Windows 2000 or moving Links to a new server, please call our hotline 1300 552 600.
